machuang@romacredit.com

The interior of this 7-seater imported Toyota Hiace has a full partition design, using Bentley yellow and imperial blue. The classic color scheme is suitable for both business and home use. The imported Toyota Hiace is equipped with a 3.5L V6 engine with a high horsepower of 282 and a net power of 207kW. It is not picky about oil or road, and the high power is more powerful. The whole car has been upgraded to a black body, and the black warrior style surround has been customized, which is very domineering. LED dual-lens driving lights make driving safer in foggy weather. The body size is: 5915mm*1950mm*2280mm, and the wheelbase is 3860mm. Therefore, the Toyota Hiace has an ultra-wide interior space, which has obvious advantages over similar commercial vehicles, and it can be driven with a blue license plate C license. The upgraded LCD central control screen includes navigation, audio and video entertainment, 360-degree imaging and other functions. In order to meet the diverse needs of customers, mahogany panels, lifting TVs, pull-out umbrellas, push-type drawers, etc. are all available. Two upgraded Venus aviation massage seats are equipped with ten electric adjustments including slide rails, backrests, leg rests, ventilation, heating, massage, and memory. There are two adjustment modes: physical buttons and touch screens. This seat also has a unique shoulder adjustment function, which makes your body more relaxed and comfortable when riding. The entire frosted marble pattern floor is wear-resistant and textured. The middle row footrest is also a hidden shoe cabinet, which is convenient for you to change into comfortable slippers after a tiring day. The integrated ceiling light is dotted with stars and surrounded by a circle of flowing water atmosphere lights, which is magnificent. The middle row aviation seats can be rotated 180 degrees to form a facing mode with the third row, and the space is wide. With a small table, you can work for business or play cards at a party. The electric sofa bed in the third row can be completely flattened 180 degrees. You can lie on it to rest for a while during a long journey to recharge your energy for the next play. The side wall of the back row is made into a multifunctional storage space, which can not only store items, but also is equipped with wireless charging, USB interface, etc., to help you get rid of power anxiety. The Toyota Hiace combines business reception and mobile RVs, and is very popular in the current business reception and government reception markets. Its price of six or seven hundred thousand yuan also makes it a leader in business vehicles in terms of cost-effectiveness.
